

## STOCKS ARE ACTIVE STEEL MAKES GAIN

Heavy Buying of Union Pacific and Steel Are Features of Market.

New York, N. Y., Sept. 21.—Buying of stocks was resumed with the opening of today's market, with especial activity in Steel and Reading at fractional advances. Hill issues and Union Pacific, as well as some specialties, also scored slight gains.

Buying of Union Pacific and Steel in large volume continued through the first hour, both rising briskly, but the rest of the list showed no material changes from initial prices.

The stock market today added substantially to yesterday's rise on a volume of business far in excess of recent week ends. While the movement took in a variety of issues, its chief impulse was derived from such speculative leaders as Steel, Reading and Union Pacific, all of which recorded material gains. The advance was assisted by further short covering and moderate investment demand. Some easing of money rates also was a contributing factor.

NEW MEXICO HAS THE FIRST KILLING FROST OF SEASON

Albuquerque, N. M., Sept. 21.—Killing frost in New Mexico is a month earlier this year than usual, according to records compiled by A. C. Heyman, local weather observer. With the temperature down to 32 degrees there was a heavy frost which nipped sorghum, tomatoes and other vegetables as well as flowers. The first killing frost occurred on Oct. 17.

## HEAVY RECEIPTS DEPRESS WHEAT

Corn Turns Weak as Rain Prevents Damage; Provisions Steady.

Chicago, Ill., Sept. 21.—Expected large world shipments had a depressing effect today on the wheat market. Prospects were also for continued heavy receipts northwest. There was no export demand. Opening figures varied from 1/4 below to a shade advance.

December started 9 1/2 to 1 1/2, a sixteenth amount up, touched 9 1/2 and then fell to 9 1/4.

The close was easy with December 1/4 lower, at 9 1/4.

Corn turned weak because frosts were not so general as had been looked for and rains had prevented damage.

December opened a shade down to a shade advance at 54 1/2 to 1/4 and sagged to 53 1/4.

The close was steady at a net loss of 1/4 for December, at 53 1/4.

An easy feeling prevailed in the oats market owing to the downward tendency of wheat and corn. December unchanged to a shade lower at 32 1/2 to 3/4 and declined to 32 1/4.

It was a slow and steady market for provisions. The first sales ranged from 5 off to 2 1/2 advance with January at \$18.30 for pork; \$10.82 1/2 for lard and \$9.87 1/2 for ribs.

ATTRACTIVE NEW STYLES IN FALL FOOTWEAR

WOMEN will have ample opportunity to select attractive footwear from the new styles now being shown for the fall. Manufacturers have given particular attention to producing styles that will harmonize with the present trend in garments to the best advantage, so that the well dressed woman can feel assured of being able to obtain the most attractive combination in her costume throughout.

As a type, the button boot is the leading style feature. This type of shoe began to come into favor strongly when short skirts came into vogue because the feet were brought into greater prominence, and it was necessary to have attractive footwear. The button shoe met this requirement better than any other type, and has grown in popularity steadily for several seasons until today almost 90 per cent of the shoes worn by women are of this variety.

Although there has been a change in skirt styles, including greater length, the button shoe is still considered the most desirable, the only change that has been effected being shorter boots. There is, however, a wide range of choice in leathers and patterns. For early fall there will be worn a great many boots of white buck and tan calf.

A prominent style feature will also be the use of fabric and suede tops in connection with tan, patent and dull calf vamps. These combinations promise to be the leading style feature for early fall wear, and will be shown in various delicate color combinations. In line with this style trend overgaiters will also be worn with lace oxfords.

In the higher grade of shoes, from \$5 up, the lower toe with a slight recede effect will be the prevailing last, but in the medium price grades the high toe with the short vamp is still most popular. The accepted height of toe, however, is lower than last year. The round full toe will also be worn to a large extent, and very much is to be said in favor of these toes from the standpoint of comfort and fitting qualities.

With the advent of cold weather gun

metal leather will be the most popular material for boots, and button boots of from 6 1/2 to 7 inches in height will have the call. This height is equivalent to about 15 buttons. There will be storm and walking boots of greater height and the lace pattern and tan leather will be used largely for this type.

A new tan leather that will wash and retain its original color has appeared. This will no doubt add to the tendency for wearing tans the year around.

The accepted height of heel is a trifle lower than heretofore, many women having shown a preference for lower heels, especially for street shoes. The slant effect will be maintained in the tops of medium priced boots, but in higher grades there will be a return to the straight tops. Patent leather boots, especially in combination with cloth and suede tops, will be worn quite largely for dress shoes, and there is evidence for more shoes of kid leather.

In slipper styles for evening wear there is the usual number of attractive novelties, the selection of this kind of footwear being largely a matter of taste and judgment in matching the costumes with which they are to be worn. One prominent style feature of evening slippers, however, will be ornamentation with jeweled buckles and jeweled ornaments on the heels. This is a style feature imported from Paris. It has been very prominent there and promises to become popular in this country.

Fall Styles for Men.

In men's shoes the new styles are not as varied as those for women. Gun metal and tan calf will be the leading leathers with patent and black kid in fair demand for dress shoes. In higher grades of men's shoes the narrow, low toe with slight recede and low heel will be the prevailing type. As in women's shoes, the medium grades are made largely with the full, round toe, or the moderately high toe, with a medium short vamp.
